PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in Full Stack development, strong programming fundamentals, and a keen interest in UI/UX design. Experienced in building scalable web applications, interactive dashboards, and intuitive user interfaces and modern development tools. Passionate about Agentic AI, user-centered design, and creating innovative digital solutions that deliver seamless user experiences.

EDUCATION

Yeshwantrao Chavan College of Engineering <i>Bachelor of Technology in Computer Science and Engineering, 8.5 GPA</i>	Nagpur, Maharashtra 2027
Bhavan's B P V Mandir <i>Higher Secondary Education, 84.60%</i>	Nagpur, Maharashtra 2023
St.Vincent Pallotti School <i>Secondary School Education, 91.83%</i>	Nagpur, Maharashtra 2021

EXPERIENCE

Microsoft AI Azure Internship <i>Microsoft Learn Student Ambassador / AI Internship Program</i>	2025 Remote
- Completed a virtual internship focused on Artificial Intelligence and Microsoft Azure cloud services - Deployed and managed AI solutions, including an object detection computer vision project using Azure Cognitive Services - Gained hands-on experience with cloud computing, model training, and AI service integration - Developed an understanding of real-world AI deployment pipelines and scalable cloud architecture	

PROJECTS

Parivahan Vision - AI-Based Traffic Monitoring System <i>Python, YOLO, OpenCV, TensorFlow</i>	2026
- Built an AI-driven traffic monitoring system capable of detecting violations such as overspeeding, signal jumping, illegal parking, and lane violations - Implemented automated evidence logging, number plate monitoring, and centralized dashboards for traffic surveillance and reporting github.com/veerwanjari/ParivahanVision	
Prakriti Connect - Environmental Event Management <i>React, Node.js, Express.js, MongoDB</i>	2025
- Developed a platform for environmental event discovery, volunteer registration, and participation tracking - Implemented role-based access, real-time notifications, and analytical dashboards for efficient event and community activity management github.com/veerwanjari/PrakritiConnect	
FitFlex - Gym & Fitness Website <i>React, Vite, React Router</i>	2024
- Developed a fully responsive gym and fitness website with Home, About, and Contact pages, using React Router for seamless client-side navigation and a modular component architecture - Built a reusable UI library including header, footer, and animated statistics counter components, paired with a custom dark-themed design system featuring lime accents and Bebas Neue typography, then deployed the production build on Vercel github.com/veerwanjari/FitFlex	

ACHIEVEMENTS

College Event Organization (YCCE TechFest) <i>Problem Solving, Team Collaboration, Communication</i>	2026
- Organized and coordinated college events by managing planning, logistics, task delegation, participant coordination, and timely execution while collaborating effectively with student teams - Applied problem-solving and critical-thinking skills to address operational challenges, prioritize tasks, adapt to changing requirements, and maintain a smooth and successful event experience	
LeetCode Problem Solving (150+ Problems) <i>Linked List, Stack, Queue, Trees, Graphs, Greedy, Heap, DP</i>	2026
Solved 150+ algorithmic problems covering arrays, linked lists, stacks, queues, trees, graphs, dynamic programming, and core system fundamentals	

- Strengthened coding efficiency, problem-solving ability, and analytical thinking through consistent practice, optimized solutions, and continuous improvement in algorithmic techniques leetcode.com/u/veerwanjari/

VAC - Campus To Corporate Topper | *GD, DS, OOPs, DBMS, Professional Skills* 2025

- Recognized and Facilitated for outstanding performance

Smart India Hackathon & Smackathon (YCCE TechFest) | *Competitive Coding, Team Collaboration* 2024

- Competed in Smart India Hackathon 2025 and a college-level hackathon, contributing to teamwork, innovation, and technical solution design
- Enhanced coding efficiency and competitive programming skills by practicing data structures and algorithms under contest conditions

TECHNICAL SKILLS

Languages: Java, SQL

Frontend: HTML, CSS, JavaScript, React.js

Backend & Databases: MySQL, Node.js, Express.js, MongoDB

Tools: Git, GitHub, VS Code, Vercel, Agentic AI

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems

AI & Cloud: Computer Vision, TensorFlow, OpenCV, YOLO, Cloud Computing, Microsoft Azure
